Work Experience

System Administrator/Developer
New York State Income State
Jan 2010 – Present

Worked on a small team, my responsibilities included: keeping the servers secured, maintaining the database, writing custom scripts, and providing tech support for both hardware & Software issues. After a year, I was assigned the task of developing a website for the company. Commonly used tools in my job included: SSH, Squid Proxy server, and Sublime text editor.

Customer Service Associate
Citibank
Jan 2016 – Present

Helped clients conduct their everyday banking. Explained to clients how to use new features on the Citimobile APP such as voice recognition, and global transfers. I made sure customers were comfortable using the new technology by explaining it layman's terms when necessary. Got the great opportunity to work on Citibank's internal employee websites.
